

What is claimed is:

1. A percussion musical instrument comprising:

a set of clave blocks each comprising a body having an open cavity therewithin;

5 said bodies having substantially equal exterior dimensions and assorted volumes of
said open cavities therewithin provided to generate musical tones of assorted pitches.

2. The musical instrument as defined in claim 1, wherein said set includes three clave
blocks including a low pitch clave block provided to generate a low pitch tone, a medium
10 pitch clave block provided to generate a medium pitch tone and a high pitch clave block
provided to generate a high pitch tone.

3. The musical instrument as defined in claim 2, wherein a volume of said open cavity
of said low pitch clave block of said set is larger than a volume of said open cavity of said
15 medium pitch clave block, and wherein said volume of said open cavity of said medium pitch
clave block is larger than a volume of said open cavity of said high pitch clave block.

4. The musical instrument as defined in claim 1, wherein said body of at least one of
said clave blocks has a mounting ring.

20

5. The musical instrument as defined in claim 1, wherein said body of each of said
clave blocks is made of plastic material.

6. The musical instrument as defined in claim 1, wherein said body of each of said
5 clave blocks is made by injection molding process.
